Donations of Bibliographic Material in Local Public Libraries

- Oliva Library Service welcomes donations of bibliographic material, either from private individuals or from institutions, which contribute to the widening and updating of the library's available content.
 - In spite of that, following the interest criterion and usefulness, we reserve the right to accept entirely or partially the donation after having valued the material and its suitability to our existing content.
 - Once the previous selection has been made, the accepted material becomes municipal property administered by the Library Services.
 - At the point of donation, the individual or institution in question expressly renounces possession of the donated materials and accepts the conditions outlined above. In no event may the individual or institution request the return of the donated materials, or make complaint for any subsequent action taken by the Municipal Library Services.
 - Regarding books donations, the Library is particularly interested in works about local and regional subjects, authors born or living in our city, thematic or content works with total validity and literary works in good condition, preferably in the European Community country languages.
 - On the contrary, the Services will not accept, VHS or BETA tapes, text books, obsolete works or poor condition materials (bad condition binding, lined, with annotations, broken pages, etc), with the exception of the ones before 1958 or those with special extra value.
